About us

Foreword Coffee Roasters is a coffee company and social enterprise member of raiSE since 2017. We provide an inclusive work environment for persons with disabilities, special needs, and mental health needs.

We operate cafes and provide end-to-end coffee services such as roasted coffee beans, custom coffee brew bags, and mobile coffee carts.

Barista-as-a-Service

Looking for a in-house barista service for your office? We provide end-to-end consultancy services to take care of your caffeine needs!

In our Barista-as-a-Service (BaaS) program, Foreword will provide manpower support as a service for your in-house cafe. Your partnership with us will support our inclusive vision, as this program allows more people with disabilities and/or mental health needs to get gainful employment while also raising awareness of social inclusion in your office!

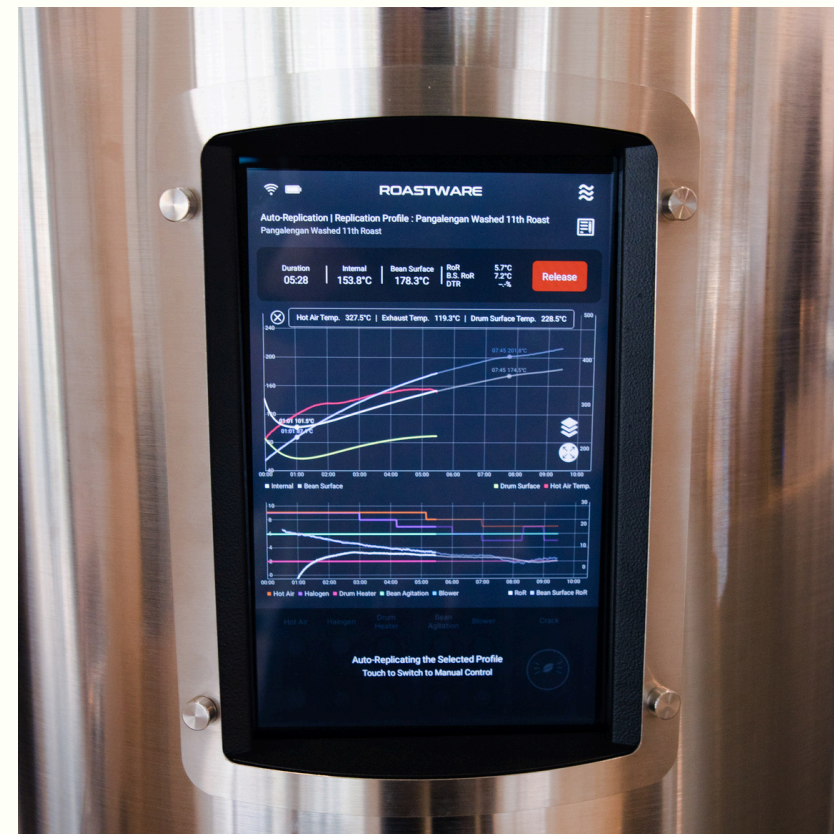

Other Services

How we roast

We use the Ikawa coffee roaster for sample roasting. Each batch is 50g, which yields sufficient roasted samples for us to conduct cupping over a few times to have an idea of the flavour profile.

For production roasting, we use the Stronghold S8X, a state-of-the-art smart roaster system which allows us to replicate the roast profile consistently across roasts. The Stronghold S8X ensures that different roast batches would taste the same, while allowing us to create a "Coffee Roaster Assistant" role to make our workflow more inclusive for people with special needs.

Roasted Coffee Beans

Our coffee beans selection is updated every half-yearly with new stocks from our coffee partners. Prices will be quoted according to the available beans and will be subjected to prevailing GST rates.

Our coffees are imported from responsible coffee partners in Coorg (India) and Yunnan (China). We also purchase a variety of coffee from local importers. We roast freshly every week and have a lead time of 3-5 working days to fulfill your order. We can also customize your unique coffee blend for your company!

Terms & Conditions:

- Min. 5kg per order to enjoy free delivery to your location
- Custom blends require a \$200 R&D fee
- Custom coffee bag designs can be separately designed

Coffee Brew Bags

Coffee bags are a great way to showcase your brand and provide convenience to your customers. You can choose from our existing coffee with custom packaging options or create custom blends for your unique coffee experiences.
